

SOCIAL DISTANCING

COVID - 19 is primarily spread through respiratory droplets produced when an infected person coughs or sneezes

People who have sustained contact within 6 feet of an infected individual are most at risk of transmission

DISTANCIAMIENTO SOCIAL

COVID - 19 se transmite principalmente a través de gotitas respiratorias producidas cuando una persona infectada tose o estornuda

Las personas que han mantenido contacto a menos de 6 pies de una persona infectada tienen mayor riesgo de transmisión
